### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

1. Claims 1-2 are presented for examination.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2 are rejected under 35 U.S.C. 102(e) as being anticipated by Mogul et al (U.S. Patent No. 6,243,761).

4. As per claim 1, Mogul et al teaches a method for sending and receiving multimedia transmissions between two or more clients, the method comprising the steps of:

measuring a maximum bandwidth value on a connection between a client and a server  
**(column 4, lines 10-15 and 28-34);**

transmitting multimedia data at or below the maximum bandwidth value from the server  
to the first client **(column 4, lines 34-53);**

tracking a latency value for the transmitting of the multimedia data from the server to the first client (**column 4, lines 10-15 and 28-34**); and

adjusting the maximum bandwidth value based on the latency value (**column 4, lines 10-15 and 40-53**).

5. As per claim 2, Mogul et al teaches a system for sending and receiving multimedia transmissions between two or more clients wherein each client generates and received audio and video data, the system comprising:

a server receiving the audio and video data from the connection to the first client (**inherent server function; it is well know in the art that servers can send and receive information**) for transmitting the audio and video data over a connection to second client (**column 4, lines 15-24**), wherein the server dynamically determines a bandwidth at which the second client can receive the audio and video data and transmits the audio and video data to the second client at or below the determined bandwidth (**column 4, lines 25-53 and abstract**).
